

What is an Abacus?

Abacus is a simple tool or a hardware used for performing rapid arithmetic calculations. Calculations based on abacus was invented at ancient times and now widely used a brain development program. It consists of a rectangular frame holding a number of vertically arranged rods, on which beads slides up and down.

- **One of the most popular calculating method from ancient times.**
- **Children do fast calculations in mind by visualizing Abacus bead movements.**
- **Researches proves that Abacus learners uses both sides of the brain- left hemisphere & right hemisphere.**
- **Highly effective in improving the concentration level of children.**
-

What is Mental Arithmetic?

- **'Mental Arithmetic' is a term used in Abacus for the calculations done in mind.**
- **Even large numbers can be calculated in mind, that too within seconds**
- **'Mental arithmetic' improves student's imagination skills**
- **Effective in cracking competitive time based tests.**
- **Mind calculation enhances the concentration level of child.**

Course we are offering:-

There are 2 types of Course we are offering:-

Junior Level

Age Group: - 4 or above

Course Level: - 0 to 8 Level

Duration of Each Level: - 3 Months

Senior Level

Age Group: - 6 or above

Course Level: - 1 to 8 Level

Duration of Each Level: - 3 Months

What are the advantages of Abacus?

- Mental arithmetic Calculations
- Improves Concentration skills
- Improves imagination skills
- Sharpen memory power
- Boost confidence
- Personality Development
- Attitude Formation
- Positive Belief System.
- Brain Gym.
